

**Alta Via Consulting, LLC**

"A Better Use of Information"

## **Position Description**

*Principal Consultant-Senior Manager (SEM)*

Alta Via Consulting, LLC seeks to hire an individual with extensive experience in advanced cost management, analytics and modeling tools for its position of Principal Consultant.

The position requires that a qualified person hold at least a bachelor's degree or foreign equivalent in computer science, business, economics, finance, accounting or closely related field, have five (5) or more years experience in a functional business area, such as information technology, accounting/finance, manufacturing, logistics or related field; possess three (3) or more years of experience applying this knowledge to requirements definition for enterprise-wide Information Technology (IT) systems or gap/fit analyses for Government-Off-the shelf (GOTS) and Commercial-Off-the Shelf (COTS) software solutions; use of SAP, including BPS, SEM, FI/CO, BI/BW, BO, FM modules. In addition, we seek an individual with in-depth knowledge of Cost Management with experience in advanced cost models like GrenzPlanKostenrechnung (GPK), Resource Consumption Accounting (RCA), and Activity-Based Costing (ABC). The qualified person should also be familiar with the latest industry trends and developments related to enterprise IT solutions.

The qualified resource, as a result of the experience above, will not only have participated in business process reengineering, implemented systems, and managed projects with external resources, but also have an understanding of best practices, project management, system implementation, change integration, and practice development.

Key aspects of this role include, but not limited to, operating as a project manager/functional lead for full-lifecycle system integration projects, providing depth of functional knowledge of business process re-engineering and implementation of best practices, managing project team staff, performing business analysis activities, participating in business case development, evaluating requirements and providing recommendations for processes within ERP solutions, ensuring solutions are in line with user expectations and successfully integrate with other system aspects.

A unique aspect of this particular role will be developing and building a client base for SAP's new Cost and Quotation Management (CQM or xCQM) product as well as the niche-centric Product Design Costing Engine (PDCE). As a result, this role requires deep product knowledge, client application experience, and the ability to maintain a tight relationship with SAP development on behalf of AVC in order to ensure advanced release knowledge and guide future product development for AVC's client base. The role also requires client service for the demand of either the CQM or PDCE products.
